DETAILED ACTION

Status of the Claims

1. Claims 84, 90, 93, 97, 104, and 109, were pending in the application upon the mailing of the Final Action on March 9, 2004. In that action, all of the pending claims were rejected. An After Final Amendment was filed on July 9, 2004. While the amendment was entered into the application, it did not bring the application into condition for allowance. See, the Advisory Action (indicated in PALM as mailed on August 19, 2004, a copy of which is attached to the present action). The Examiner called the Applicant and indicated that the claims would be allowable if claim 104 was amended to limit the claims to embodiments wherein the antigen was the complete Her2 antigen. The Applicant did not accept the amendment at that time. See, Interview Summary, mailed on August 19, 2004. However, on September 8, 2004, the Applicant called the Examiner, and indicated that they would accept an Examiner's Amendment making the change to bring the case into condition for allowance.

2. In view of the Amendment below, claims 89, 90, 93, 97, 104, and 109 are allowed.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Karen A. Magri on September 8, 2004.

Pending claim 104 has been amended to read as follows:

104. A composition comprising infectious Venezuelan Equine Encephalitis (VEE) replicon particles, wherein said VEE replicon particles comprise one or more heterologous nucleotide sequences encoding the Her2 antigen, and wherein said VEE replicon particles infect antigen-presenting cells, and further wherein said VEE replicon particles comprise one or more attenuating mutations.

4. Claim 104 has been amended to include amendment suggested in the interview summary mailed on August 19, 2004 (i.e. to narrow the claims to embodiments wherein the antigen is the full length Her2 antigen, and not any Her2 gene product). The amendment was made to bring the application into condition for immediate allowance.

In view of the amendment above, the claims have been limited to those embodiments indicated in the Final Action to be allowable over the prior art as achieving unexpected results. The rejection is therefore withdrawn from the claims as amended.
